Summary

I am a passionate programmer and educator specializing in game development and software engineering; I have been working hard for over 6 years to equip high school students with the skills and certifications necessary for success in the gaming industry. I possess proven experience in teaching and utilizing Unity, C# Programming, App Development, Web Design, along with many important communication skills.

Experience

Game Development CTE Teacher and Esports Coach
Corsicana Independent School District
Aug 2020 – Present (3 years 7 months)

- Instruct high school students in game programming and design, focusing on Unity, C# and other Object-Oriented Programming languages, as well as team-based projects.
  - Maintained a certification rate of >80% for all of my students on the Unity Certified User: Programmer Exam.
- Ensure constant and effective written and verbal communication with colleagues, students, parents, and administrators by practicing empathy, honesty, and understanding.
- Lead the esports teams to success through recruiting, organizing practices and matches, and leading video scouting sessions.
  - Our Super Smash Bros. Ultimate team took a 4th place finish out of over 110 teams in Texas (Fall 2022 season).
  - Our League of Legends team finished Top 8 out of ~60 teams in the Central US (Fall 2023 season).

Information Technology Staff and CTE Instructor
Corsicana Independent School District
Oct 2017 – Present (6 years 5 months)

- Instruct high school level CTE classes in App Development and Web Technology, focusing on Swift, XCode, HTML, CSS, and JavaScript.
- Member of a small team responsible for maintaining and managing over 6000 devices and users.

- Solely oversee the management of 500+ iPads, utilizing Active Directory, SSO, and Mobile Device Management solutions including Iboss and Mosyle Manager.
